## The search for harmony

represents the inner philosophy of Takler. Just like single notes in a symphony, every little detail has to be perfect in the whole.

Following this principle we have created an excellent product: a plastic insert for side protecting bars. What might seem in appearance just a simple piece of plastic, in reality, is absolutely

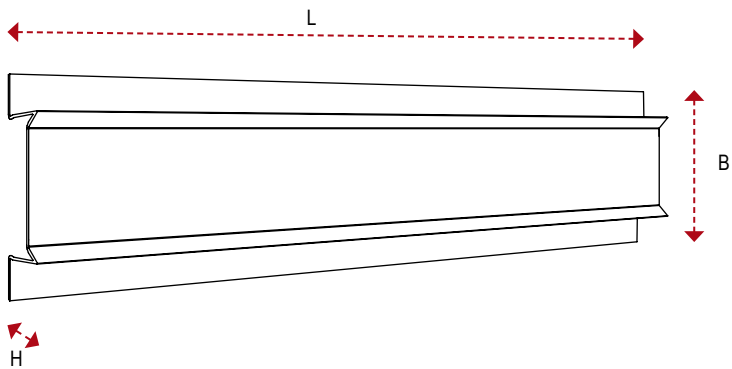

an innovative product. Characterized by an accurate design, the possibility to be personalized and at stable price, this item has become the “number one” in its field.
